

CONNIPTION™

OBJECT OF THE GAME

Be the first player to line up 4 of your same color discs vertically, horizontally or diagonally.

GAME PREPARATION

Place the board on a solid surface. Make certain that the top sliding-knob is in locked position so that the game pieces can slide down the slot openings. Choose which color of disc to play, either white or blue, placing them in front of you along with 4 red 'Flip Chips' per player. These chips will help you keep track of how many times you flip the board.

GAME PLAY

Decide who plays first. In turn, each player drops one of their discs down any slot on the board (Fig. 1). During the course of the game, you may decide to flip the board, sending the discs tumbling into new and potentially winning patterns. But take heed as the pattern may benefit your opponent more than you! You may 'flip the board' before, AND/OR after, playing your disc. NOTE: AT LEAST ONE DISC MUST BE PLAYED BETWEEN FLIPS. FOR EXAMPLE, A PLAYER MAY NOT START THEIR TURN WITH A FLIP IF THE OTHER PLAYER ENDED THEIR TURN WITH A FLIP.

FIG. 1

FLIPPING INSTRUCTIONS

Again, each player may flip the board a maximum of four times during the game. Flipping is done before, AND/OR after, playing your disc. To flip the board, start by moving the top sliding knob toward the center, thereby unlocking the unit and locking in the discs. Once the board has been flipped, make certain that the top sliding knob is in locked position and hand in one red 'flip chip'.

FIG. 2

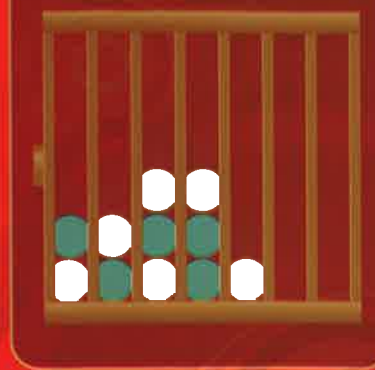

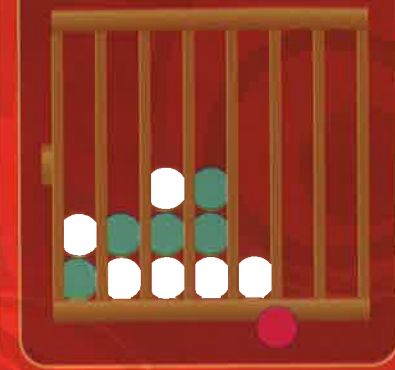

FIG. 3

WINNING

The game ends when 4 same color discs line up vertically, horizontally, or diagonally. Fig's 2 + 3 demonstrate a winning pattern of 4 white before, and after, a flip. It does not matter which player caused it; it is the color of the discs that determines the winner. If both players have 4 in a row after a flip, the player who flipped the game wins.

Family Games America FGA Inc. takes pride in manufacturing high quality games and puzzles using natural materials. Please keep in mind that natural fibers have a tendency to react to variances in global temperatures and conditions. Differing humidity levels may cause wood to swell or shrink, thereby causing pieces to loosen, tighten, or puzzle mechanisms to block temporarily. Please use a drop of carpenter's glue to reattach any loose pieces, and use patience for tight or blocked pieces. Thank you.

Family Games America FGA Inc. est fière de fabriquer des jeux et des puzzles de haute qualité en utilisant des matériaux naturels. Les fibres naturels ont tendance à réagir aux variations des températures et des conditions atmosphériques. Le taux d'humidité de l'air peut causer un gonflement et un rétrécissement du bois, entraînant un resserrement des pièces ou un trop grand jeu entre celles-ci ou encore peut bloquer temporairement le mécanisme du puzzle. Veuillez appliquer une goutte de colle à bois pour fixer de nouveau toute pièce qui se serait détachée et faire preuve de patience lorsque des pièces sont trop serrées ou bloquées. Merci.
